COMPLETE BRAND IDENTITY SYSTEM

01

BRAND ESSENCE

The Soul of the Brand

CORE IDEA — ONE LINE

The music that was always yours — finally made.

Mission

To transform personal memory, emotion, and identity into original, cinematic music — making every person feel that their story deserves to be heard, not just lived.

Vision

A world where every meaningful moment — a love, a loss, a milestone, a memory — has its own song. YourGbedu is the bridge between what you feel and what the world hears.

Brand Promise

Give us your moment. We give it back as music so true it sounds like it was always playing somewhere inside you — waiting to be found.

FOUR BRAND PILLARS

Memory

The Raw Material

Every song begins with something real — a first message, a last goodbye, a place that changed you. Memory is sacred data.

Identity

The Cultural Root

Your sound is shaped by where you come from. Gbedu honors

the rhythmic intelligence of African storytelling fused with global sonic language.

Emotion

The Engine

We don't create melodies. We translate feelings into frequency — grief, joy, longing, pride — all have a sound. We find it.

Permanence

The Gift

A song outlives a moment. YourGbedu turns the ephemeral into the eternal — something you can replay, share, and keep forever.

02

TAGLINES

Words That Carry the Brand

Eighteen distinct lines across three registers — Premium Emotional, Short & Viral, and Culturally Resonant. Each one is a door into the brand.

The music that was always yours — finally made.

PREMIUM EMOTIONAL · HERO LINE

Every feeling deserves its own frequency.

PREMIUM EMOTIONAL

Not a song about you. A song that is you.

PREMIUM EMOTIONAL

Your memory. Our music. One truth.

PREMIUM EMOTIONAL

Give us a moment. We'll make it permanent.

PREMIUM EMOTIONAL

Some things shouldn't fade. Now they won't.

PREMIUM EMOTIONAL

Your vibe. Your sound.

VIRAL · ULTRA SHORT

This song knows you.

VIRAL · MYSTERY HOOK

Music made from memory.

VIRAL · PRODUCT-LITERAL

Send the song they'll never forget.

VIRAL · GIFT TRIGGER

You felt it. Now hear it.

VIRAL · REVEAL MOMENT

The gift that plays forever.

VIRAL · GIFTING

Your story has always had a beat.

CULTURAL RESONANCE

Rhythm is memory. Now it's yours.

Rhythm is memory. Now it's yours.

CULTURAL RESONANCE

From Gbedu, with love — worldwide.

CULTURAL RESONANCE · GLOBAL NOD

African soul. Global sound. Your song.

CULTURAL RESONANCE

Born from rhythm. Shaped by you.

CULTURAL RESONANCE

Where identity meets harmony.

CULTURAL RESONANCE · PHILOSOPHICAL

03

BRAND STORY

The Narrative That Started Everything

Somewhere in Lagos, a grandmother hums a song she never taught anyone. Somewhere

in London, a man replays the last voicemail his father left. Somewhere in Toronto, a woman tries to describe in words what it felt like the night she fell in love — and the words keep failing her. *Language runs out.* Memory doesn't.

> *"Music was always the thing that arrived where words couldn't."*

In West Africa, Gbedu is not just music. It is the conversation between people and their present moment. It is the sound of who you are, where you come from, and what you feel — all at once. Gbedu is rhythm as identity. Rhythm as truth.

We built YourGbedu because we believe that every person alive carries a song inside them — unwritten, unheard, waiting. Not a song about them. *A song that is them.* Their specific grief. Their particular joy. The texture of their love. The weight of their sacrifice. The precise feeling of a Tuesday evening that changed everything.

We built the intelligence to hear what you feel, translate it into sound, and hand it back to you — recognizable, cinematic, undeniably yours.

> *"This is not AI generating music. This is AI finally understanding music had always been personal."*

YourGbedu is not a tool. It is not a feature. It is a category that did not exist before — the marriage of African rhythmic intelligence, emotional precision, and generative music craft. It is the moment technology becomes intimate.

When you send someone a YourGbedu song, you are not sending them audio. You are sending them proof that they mattered enough for you to make something that could never have existed without them.

That is the power of Gbedu. That is the promise of yours.

04

COLOR SYSTEM

A Palette Built From Feeling

Premium before playful. Expressive but disciplined. Every color carries both an emotional frequency and a cultural resonance — the way a musical note carries both pitch and feeling.

PRIMARY — THE FOUNDATION

OBSIDIAN NIGHT

#0A0807

The silence before the song

EMBER GOLD

#C8832A → #E8B84B

Living warmth. The glow of fire at

begins. Depth without darkness. The canvas that makes all emotion visible. Culturally: the fertile earth, the space where ritual is born.

ceremony. Earned wealth. The moment a song finds you. Culturally: bronze, beads, Yoruba aso-oke, the brilliance of Kente at its most alive.

HARMATTAN IVORY

#F2EDE4

Warmth without harshness. Breath on paper. Body text that never competes. Culturally: harmattan light — that pale, hazy luminance that softens everything it touches.

SECONDARY — EMOTIONAL DEPTH

VIOLET PLUM

#2E1A2F

Longing. Late-night emotion. The richness beneath restraint. Used for gradient backdrops and emotionally charged screens — love, grief, memory.

DEEP INDIGO

#1A1635

Contemplation. Midnight clarity. The frequency of thought before it becomes sound. Used in processing states, premium UI surfaces, and visual depth layers.

TERRACOTTA

#C1603A

Energy. Creative heat. Afrobeats at full pulse. Used for calls-to-action, celebration moments, and feature highlights requiring rhythmic urgency.

ACCENT — THE VIBRATION

GOLD PALE

#F5D98A

Song reveal. The first listen. Joy as a color. Used for completion states, song delivery moments, and celebratory micro-interactions.

SAVANNA SAGE

#3D5A4C

Grounding. Quiet strength. The color of rhythm at rest. Used as a balancing accent to prevent gold from overwhelming — introduces breath.

SAGE PALE

#7BAF95

Resolution. The feeling after the song ends. Data visualization accents and secondary UI states that need coolness against warm gold.

Color Usage Rules

Dominant: Obsidian Night (60%) — backgrounds, primary surfaces, deep UI

Expression: Ember Gold spectrum (25%) — headlines, CTAs, highlights, icons

Support: Ivory + secondary tones (15%) — body copy, borders, secondary elements

Use Violet Plum and Deep Indigo only as *gradient underlayers* — never as flat fills on content.

Terracotta is reserved for *action and urgency* — never decorative.

Sage colors appear in *resolution states* — after song creation, post-completion, reflection screens.

05

VISUAL STYLE DIRECTION

Cinematic Emotional Futurism

Overall Aesthetic

The visual language is **Cinematic Emotional Futurism** — what a prestige streaming platform looks like if it were designed by a musician who studied film. Dark, deliberate, immersive. Every screen should feel like the opening frame of a film you want to stay inside.

Think: *Moonlight* meets *Her* meets a Burna Boy album cover.

Design Principles

Restraint creates luxury. Generous white space (dark space) signals premium.

Motion is emotional. Animations are slow, deliberate — nothing snaps; everything breathes.

Sound is visual. Waveforms, pulses, and frequency visuals are core design elements — not decoration.

Asymmetry signals life. Layouts tilt toward the unexpected. Never rigid grids.

Typography System

Display: Cormorant Garamond — serif elegance with emotional weight. Used for headlines, story text, song titles. Sets the cinematic tone.

Interface: Syne — geometric, modern, slightly expressive. Labels, UI elements, navigation, data.

Body: DM Sans — clean and warm. Body copy, descriptions, readable at scale.

Typography rule: headlines should feel like they were handwritten by someone who really meant it.

Imagery Direction

Human Emotion: Close crops of faces — not staged, not stock. A closed eye mid-song. Hands on a phone at 2am. The moment before tears. Real, unperformed feeling.

Sound Made Visible: Waveforms, concentric ripples, breath-like pulses. Sound as architecture.

Cultural Texture: Warm light, layered fabric, golden hour. African aesthetic as atmosphere — never costume, always context.

Layout Language

Hero screens: Full dark canvas. One headline. One waveform element. Maximum breathing room.

Song screens: The song dominates — artwork large, controls minimal, emotion first.

Share cards: Auto-generated visual identity for each song — unique waveform + moment text + brand mark.

Onboarding: One thought per screen. No feature lists. Only feelings.

Logo Direction

Wordmark: "YourGbedu" in Cormorant Garamond — lowercase "our" + capitalized "G" — the personal and the cultural in one form. The wordmark should feel spoken, not designed.

Symbol: A sound wave that, viewed closely, forms the shape of an ear — listening, intimate, personal. Scalable from favicon to billboard.

Color application: Primary — Gold on Obsidian. Secondary — Ivory on Obsidian. Reversed — Obsidian on Gold for premium printed collateral.

Spacing rule: The logo always has protected space equal to the height of the "G." Never crowded. Never small in a premium context.

06

BRAND VOICE & TONE

How the Brand Speaks

Intimate

Speaks directly to the individual. Never addresses a crowd. Feels like something written for you specifically — because everything about the product is.

Poetically Direct

Beautiful language that does not hide behind metaphor. Clear meaning delivered with weight. Not flowery — emotionally precise.

Warmly Confident

The brand knows what it does and says so without arrogance. Confidence through depth — not through technical claims or

competitive language.

Voice Rules

✓ Speak to the feeling first, the feature second

✓ Use "you" and "your" — relentlessly personal

✓ Let sentences breathe — short lines, white space

✓ Earn the poetic — every metaphor must carry real meaning

✗ Never say "AI-powered" in emotional contexts

✗ Never list features in marketing copy

✗ Never use urgency language ("Limited time," "Don't miss")

✗ Never speak to groups — only to one person

VOICE IN CONTEXT — HOMEPAGE

> *Some feelings are too precise for words. That's what music was invented for. Tell us what happened. We'll tell you how it sounds.*

VOICE IN CONTEXT — ONBOARDING

> *Welcome. Before we begin — this isn't a music generator. It's a listening machine. Tell us something true. We'll do the rest.*

> *What moment are we starting with? It can be a love. A loss. A place. A person. Whatever is most alive in you right now — that's where your song begins.*

VOICE IN CONTEXT — SOCIAL MEDIA

> *She cried when she heard it. Not because it was sad. Because it was exactly right. That's what your story sounds like when we listen closely. #YourGbedu*

> *We made him a song from the texts they used to send each other. He said it was the most meaningful thing anyone had ever given him. That's what*

Gbedu does.

> *You know that feeling that's too big for a caption? We turn that into a song. Drop a moment in our DMs. Your Gbedu is waiting.*

07

PRODUCT LANGUAGE SYSTEM

The Words Inside the Product

Every UI string is an opportunity to reinforce the brand's emotional register. Generic interface language is replaced with branded expressions that feel immersive, warm, and alive to the product's purpose.

GENERIC (REPLACED)	YOURGBEDU EXPRESSION	EMOTIONAL LOGIC
~~Create Song~~	*Begin Your Sound*	*Frames creation as a personal journey, not a technical*

		function
Upload Story / Enter Prompt	*Tell Us Your Moment*	*Positions the input as sharing, not uploading — intimate and conversational*
Processing / Generating	*Listening...*	*Makes the AI feel like it is paying attention — not computing*
Your song is ready	*Your sound has arrived.*	*Arrival implies something that was always coming — personal, inevitable*
Play	*Hear It*	*Shifts from a technical command to an invitation*
Download	*Keep It Forever*	*Frames permanence as the emotional value — not file transfer*
Share	*Send the Feeling*	*The point isn't sharing audio — it's transmitting emotion*
Regenerate / Try Again	*Listen Again — Differently*	*Removes the sense of failure; reframes iteration as exploration*
My Songs / Library	*Your Sounds*	*Ownership that is intimate, not transactional*
Gift a Song	*Make It for*	*The act of making for*

	Someone	*someone else is the emotional center — not gifting*
Choose Genre / Style	*How Should It Feel?*	*Genre selection becomes emotional direction, not technical specification*
Loading	*One moment...*	*Warm, human, unhurried — like waiting for something meaningful*
Error / Failed	*We lost the thread. Try again — we're listening.*	*Preserves the emotional metaphor even in failure states*
Sign Up / Create Account	*Start With Your Story*	*The account isn't the goal — the story is*
Premium / Upgrade	*Unlock Full Expression*	*Positions premium access as creative freedom, not a paywall*

08

VIRAL MECHANISM

Built to Be Sent

Virality is not a feature added to YourGbedu. It is a structural property of the product. When something makes you feel exactly seen, you instinctively reach for your phone. The entire platform is engineered around that instinct.

PRIMARY EMOTIONAL TRIGGERS

Love

The Gift Impulse

When someone hears a song made specifically for them — from the actual texts they sent, the memories they share — the emotional impact creates immediate desire to reciprocate or share that moment with others.

"I made this for you. Only

Surprise

The Reveal Moment

The experience of hearing your own memory returned as music is fundamentally surprising — even if you expected it. That surprise creates a shareable reaction. The "first listen" is the content.

"Wait — how does it know?"

you."

Pride

The Identity Signal

Sharing a YourGbedu song says something about who you are — someone who invests in meaning, who turns ordinary moments into something beautiful. The platform attracts people who want to be seen as creatively thoughtful.

"This is the kind of thing I do."

Memory

The Time Portal

Songs are the most powerful memory triggers known to humans. A YourGbedu song tied to a real experience creates a permanent retrieval cue — people return to it, replay it, share it on anniversaries. The song outlives the moment.

"I still play it on that date."

STRUCTURAL SHARING ARCHITECTURE

The Share Card

Every song generates a unique visual card — a waveform

fingerprint of the moment, the song title (the user's own words), and a 15-second audio preview. It auto-formats for Stories, Reels, and TikTok. Sharing is one tap.

The Dedication Link

Every song made for someone generates a unique dedication link — when the recipient opens it, they get the full song experience: their name, the story that inspired it, and the sound. The link is the gift.

The Reaction Video

The platform encourages — and stylistically supports — recording a reaction to your first listen. This reaction content is the most powerful UGC mechanic: real emotion, real surprise, undeniable proof of product impact.

The Core Viral Equation

> *Genuine emotional impact → irresistible sharing impulse → second-person experience → new user creation.*
>
> *One song made for one person creates two experiences — the maker and the receiver. Both are potential sharers. The product's virality is not manufactured. It is the emotional aftermath of something that actually works.*

09

DIFFERENTIATION

A New Category

EVERYTHING ELSE

AI music tools generate sound based on genre parameters and text prompts. They are content factories — impressive, but impersonal.

Streaming platforms deliver music others made. Discovery tools find songs that already exist. Neither creates something *new* from what is *yours*.

Custom music services exist — but they require human composers, cost thousands, take weeks, and require no emotional specificity. The output is professional but generic.

YOURGBEDU

YourGbedu is the only platform at the intersection of **emotional intelligence**, **cultural identity**, and **generative music craftsmanship**. These three elements together create something that has never existed before.

The input is not a genre. The input is *you* — your words, your memories, your relationships, your specific emotional signature. The output is not a song. It is a translation of your interior world into sound.

And it is rooted in Gbedu — the African philosophical understanding that rhythm is not entertainment. It is how humans have always processed meaning, marked transitions, and preserved memory. YourGbedu does not bring AI to music. It brings *this understanding of music* to AI.

Memory-to-Music

This is the category YourGbedu creates and owns. Not AI music. Not personalized playlists. Not custom songs.

Memory-to-Music — the technology and art of transforming lived experience into original, emotionally resonant, culturally alive

sound.

LAUNCH CAMPAIGN

10

The Idea That Starts Everything

Send the Feeling

Because some things are too important for a text message.

Core Message

"You've been trying to say something for weeks. We know exactly how to say it."

The campaign targets that universal human experience — the feeling you cannot articulate, the gratitude you cannot express, the love that is too

specific for generic language. YourGbedu doesn't help you find words. It finds the sound.

Emotional Hook

The hook is the gap between what we feel and what we can say. Every human being alive knows this gap. The campaign names it and promises to close it — not with better language but with music.

Visually: real people sitting with an unsent message on their phone. The moment before they find a new way to say it. Then — the song arrives.

HOW IT SPREADS — ORGANIC ARCHITECTURE

Phase 1 · Seed

The 100 Songs Project. YourGbedu makes 100 songs — unprompted, for real public figures, couples, and cultural moments. No announcement. Just the songs, posted quietly. Let people discover them.

Goal: curiosity and wonder before explanation

Phase 2 · Ignite

The Send the Feeling Challenge. Creator partners make songs for the most important people in their lives — parents, partners, friends. First-listen reaction videos. No scripted content. Only genuine emotional response.

Goal: proof through emotion, not promotion

Phase 3 · Scale

Your Gbedu, Everywhere. User-generated songs become the media. Every song a user creates and shares is a piece of original content carrying the brand into new audiences. The product markets itself by being itself.

Goal: the product as the campaign

Campaign Extension — "First Listen"

A documentary series of first-listen moments — real people hearing the song made from their memories for the first time. No narration. No branding. Just the face, the moment, the music.

Distributed as raw, vertical video. Unpolished by design. The authenticity is the aesthetic.

Why it works: Emotional reactions are the most universally compelling content format. A person crying — not from sadness but from recognition — at a song made specifically for them is a demonstration no advertisement could replicate.

"I wasn't expecting it to sound like that. Like me."
